Remarks

Applicant thanks Examiner Farahani for his patient and careful examination of this application and his clear explanation of the rejections; and for allowing claims 1-17. In response to the Office Action of July 27, 2005, applicant amends this application as follows:

- I. Regarding the objection to drawings, applicant amends drawing figure 5a to include the missing character 70; as for character 31, because it is not used in the description, according to 37 CFR 1.84(p)(5), it should not be included in the drawing.
- II. Regarding to claim 21, applicant amends it to incorporate all the limiting elements of claim 1. Because claim 1 stands patentable, claim 21 stands patentable as well.
- III. Regarding to claims 22, it is canceled.
- IV. Regarding to claims 18-20, they are canceled.

Applicants respectfully submit that, as amended, the drawing figure 5b includes the missing character 70 and claim 21 incorporates all the limiting elements of patentable claim 1, so this application is in patentable form and all the pending claims distinguish over the cited references and stand patentable. Applicant respectfully requests that the application be further examined and the claims pass to allowance.

Respectfully submitted,

Yingsheng Tung
